For the use of data in AI to have positive outcomes, we must ensure that the data used is both diverse and properly obtained. The division of a world-economy involves The World System hierarchy of occupational tasks, in which tasks requiring higher levels of skill and greater capitalization are reserved for higher-ranking areas.

This is not a trivial question, nor is it likely to be resolved unambiguously. I think he is probably over-critical of those whose long-term vision is different from. All of these, of The World System, are no more than initial steps, to be pursued by further study especially of the long cycles and also many shorter ones within them, which are set out in Gills's and Frank's chapter 5.

The terms of contact, whether diplomatic, cultural or commercial, would vary. Poland, Russia's wheat served primarily to supply its internal market. I admit I cannot quantify it.
