As the nerve passes through the supraorbital notch, it supplies a small branch to the mucous membrane of the frontal sinus. See if you can find the upside-down MRI!

It also joins the dental plexus to supply upper molar teeth, gums, and part of the

The special senses have their own representation in other areas and these are served by the cranial nerves Fig. The essential change to the previous exam was the introduction of pathology and theoretical optics.

The sharp infraorbital margin is formed laterally by the zygomatic bone and medially by the maxilla. At the optic chiasm, nasal retinal fibres decussate to the contralateral optic tract.
