Sally has extensive experience in public policy, service delivery and organisational change in a range of areas including arts and culture, sport, children's services, child support, child protection and mental health. Clown Group: elderly patients in 17 nursing homes; Control Group: residents in 18 nursing homes. Twohig Ed. Jumpto. Ideal for healthcare professionals as well as anyone working in a healthcare setting, the ideas presented here can also be translated to educational, corporate and training environments. The practice of involving clowns in health settings is constantly increasing, thanks to the positive appreciation provided by patients, relatives, doctors, and nurses. The authors have no funding to report.

In addition, a questionnaire was sent to nurses: Of the 93 questionnaires returned we reviewed a total of 10 empirical studies. My Wishlist.
